Göttingen, 4 Jan. 1854.

Dear Sir,

I have received your friendly letter of
the 13th inst. and according to your desire I
send to day a parcel for you to Mr.
Flügel, which contains the Suplicate
of the Ledebourian specimens that I could
spare, about 180 quires, and besides 160 quires
of South European plants, either collected by
myself or communicated by correspondents. I
wish that also there might be acceptable to
you and, if it be so, I could make it
a later parcel another choice of German
plants and; if you were not among his succe-
sors, of Youzeau's Spanish Suplicate. Of
North American plants I possess Engelmann's
collection from St. Louis and Traut's one from
Ohio and Pennsylvania, besides a choice collection
from the British territory presented to me by
his W. Hoare but containing only Polypetalae.
Therefore almost any thing from the southern
and from the mountainous tracts as well
as from the western states and from the

newly made expeditions would be highly accep-
table. But do not think, that I should
ever make any claim upon you: for I know
by my own experience, how tedious is collecting
duplication, and seldom get to it, if not
my health prevents me from scientific occu-
pation.

According to your instruction my parcel
is addressed to the Benthonian Institution,
with your name particularly written
within, and I have sent besides a
note to Dr. Flügel, that he might be
disposed to take care of it.

I have inclosed the *Verichte* for the
years 1849 and 1850; that for 1851
has not yet been printed but will be
published next spring. The first part of
my monograph on *Microzium* is also
put to the other papers: I am now
occupied with the redaction of the second
part, that will contain my general
views on European phytogeography.

My dear Sir,

Yours very faithfully
M. Griseb.

Prof. W. Gray
Cambridge.
